Monitoring and Tools

Under the Specific Objective 3 of the ESPON 2020 Cooperation Programme, "Improved territorial observation and tools for territorial analyses", the ESPON EGTC continues developing online tools for territorial analyses and mapping which will provide user-friendly support and highly-accessible territorial data for policymakers and practitioners. In addition, the ESPON EGTC continues monitoring European territorial dynamics to inform and support important policy development processes.

The following projects are available:

1. European and Macro-regional Territorial Monitoring Tool
2. ESPON 2020 Database Portal
3. ESPON Territorial Impact Assessment Tool (upgrade)
4. Functional Urban Areas and Regions in Europe
5. Big Data for Territorial Analysis and Housing Dynamics
6. SoET – State of the European Territory Report
7. Accessibility by the sea indicators
8. Scenarios for accessibility by the sea, road, rail, air and multimodal
9. SDG localising tool
10. ESPON HyperAtlas 3.0

ESPON TOOLBOX

Home / Tools & Maps

ESPON TOOLBOX OVERVIEW

Tool development within ESPON 2013 is targeted to the use of policy makers and practitioners at all administrative levels (including cross-border and transnational groupings) and will enable the use of information and data by these particular groups of stakeholders. The ESPON tools contribute to the consolidation of a European research field on territorial development and cohesion.

How these tools link to the project groups and the policy makers is visualised in the figure below. The green arrows in this figure show the use for the policy makers and the blue arrows show the flows from the ESPON projects (the Final Reports or the data resulting from the projects) to the tools and vice versa.
