FUNCTIONAL AREAS, COOPERATION BENEFITS.

SUB-REGIONAL CITIES – TERRITORIAL CONTRACT, TERRITORIAL MANDATE

CONCLUSIONS AND RECOMMENDATIONS FOR THE DEVELOPMENT OF THE ENTIRE POLISH-GERMAN INTERACTION AREA

- 1) The future lies in cities and metropolises attracting growing populations, capital and functions,
- 2) Cities have always had relations with other cities, drawing life energy from production and exchange of goods and ideas,
- 3) Cities operate in space more complex than the space that can be indicated on a map,
- 4) Cities stem from processes which result from mutual impacts of life energy of the locals on various types of stimuli and obstacles: the physical dimension of city space, institutional and political regulations,

THEREFORE

COOPERATION AND SOCIAL IMPACT SHOULD BE SUPPORTED.

Thank you for your attention
