ACPA – Adapting European Cities to Population Ageing: Policy challenges and best practices

Targeted Analysis

Annex: Demographic maps and figures

Annex: Demographic maps and figures

This targeted analysis is conducted within the framework of the ESPON 2020 Cooperation Programme.

The ESPON EGTC is the Single Beneficiary of the ESPON 2020 Cooperation Programme. The Single Operation within the programme is implemented by the ESPON EGTC and co-financed by the European Regional Development Fund, the EU Member States and the Partner States, Iceland, Liechtenstein, Norway and Switzerland.

This delivery does not necessarily reflect the opinion of the members of the ESPON 2020 Monitoring Committee.

**ACPA – Adapting European Cities
to Population Ageing: Policy
challenges and best practices**

Version 23/04/2020

Table of contents

1	Comparing neighbourhoods within each stakeholder city.....	1
1.1	Amsterdam	1
1.2	Barcelona	3
1.3	Göteborg.....	5
1.4	Greater Manchester	7
1.5	Hengelo	9
1.6	Nantes	11
1.7	Oslo	13
1.8	Zaragoza	15
2	Comparing stakeholder city regions with other regions in their countries.....	17
2.1	France	17
2.2	Netherlands	21
2.3	Norway	26
2.4	Spain	30
2.5	Sweden.....	35
2.6	United Kingdom.....	39
3	Comparing the ESPON countries with each other.....	43
3.1	Share of older people among the total population	43
3.2	Life expectancy	48
3.3	Self-declared health status.....	49
3.4	Living arrangement among older people.....	50
3.5	Citizenship of older people in Europe	51

1 Comparing neighbourhoods within each stakeholder city¹

1.1 Amsterdam

Map 1.1: Share of older people per neighbourhood in Amsterdam, 2018

Amsterdam: Share of older people 2018

Population aged 65 and over as share of total population (%)

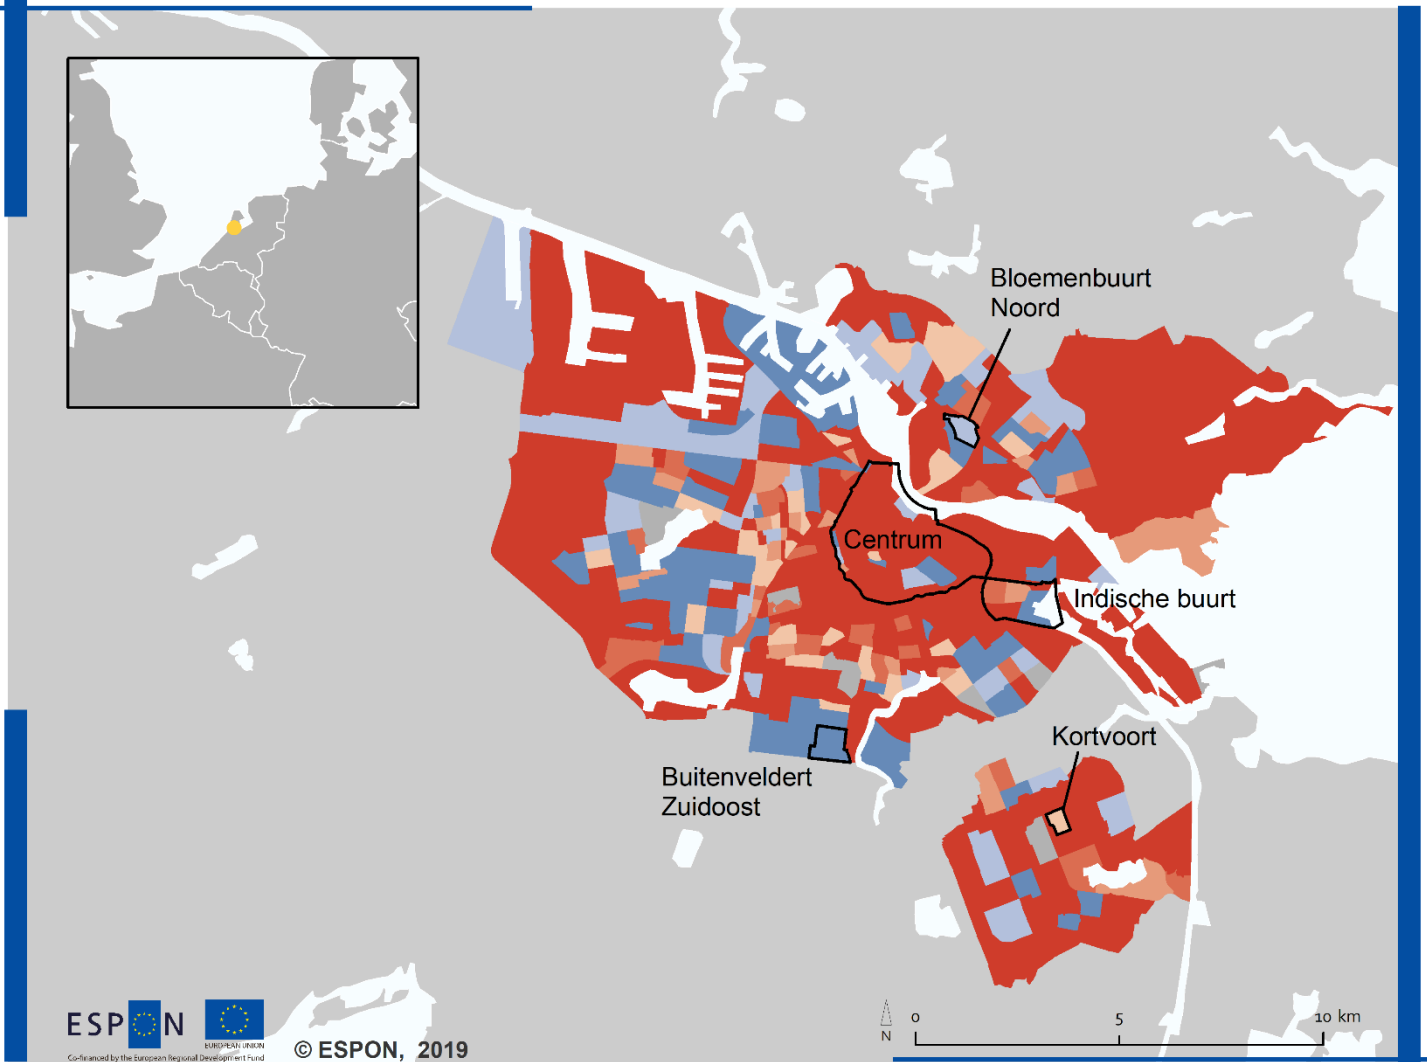

City district mentioned in the reports (main report, policy handbook and/or city report)

Territorial level: Buurten
 Source: EspoN ACPA, 2019
 Origin of data: Gemeente Amsterdam: Onderzoek, Informatie en Statistiek, 2019
 City of Amsterdam for administrative boundaries

¹ The years mentioned in the maps and figures differ per country, due to varying data sources per city. Within these limits, data for the same years have been used as much as possible. In the city level maps showing the share of older people, the most recent data that were available when the maps were made have been used. For most cities this is 2017 or 2018. For Nantes, the most recent data at the time of production were from 2015. With time series data, the ambition has been to show the development during the 2000s, going as far back in time as possible. In the European level map, the time series is 2000-2017; the aim has been to have a timespan which is as similar as possible to that in the country and city maps.

Map 1.2: Change in older population per neighbourhood in Amsterdam, 2005-2018

Amsterdam: Change in older population 2005-2018

Population change among people aged 65 and over (%)

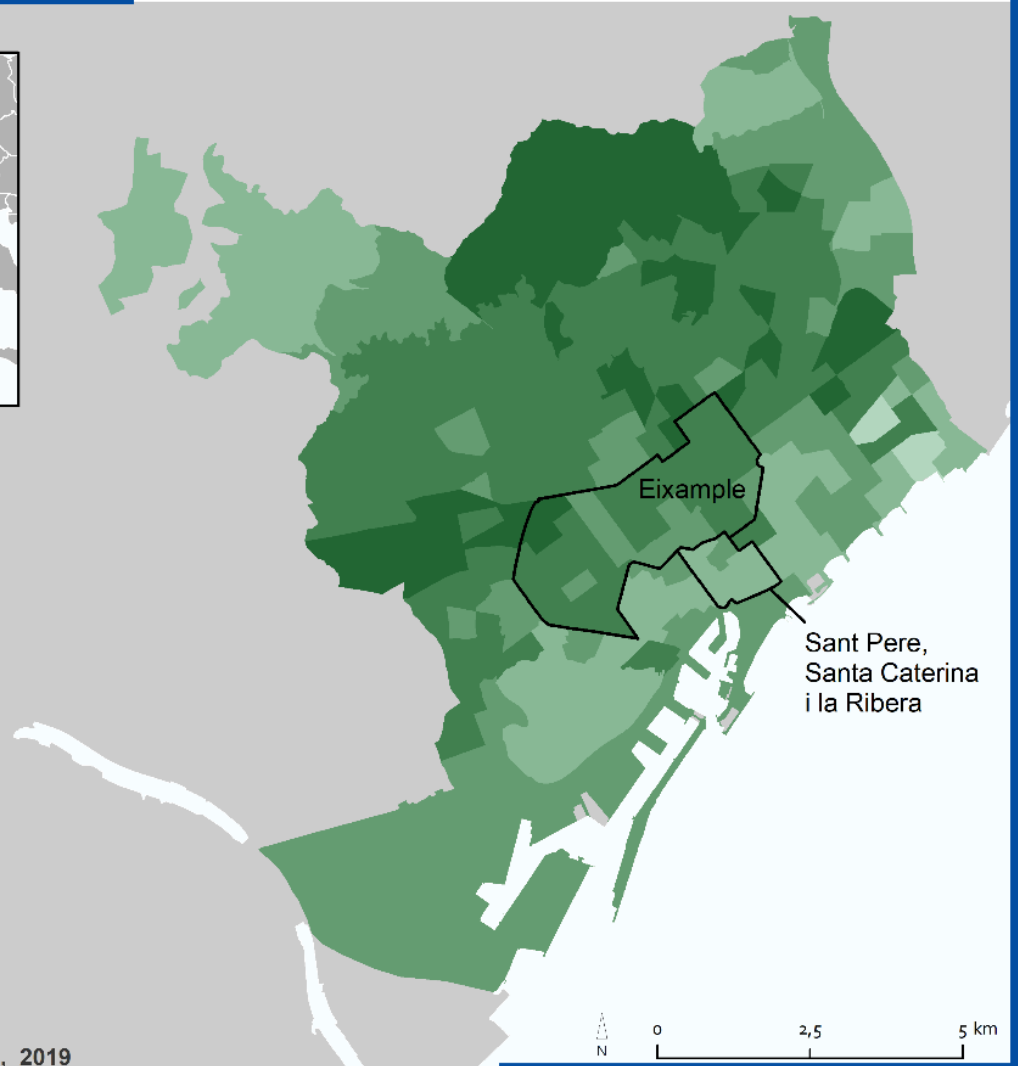

City district mentioned in the reports (main report, policy handbook and/or city report)
