

# Input to session 2.B Places resilient to crises

Efrén Feliu Torres  
(Climate Change Manager, Tecnalia)

- ESPON 2030 Programme - Consultation process on Thematic Action Plans
- Kick-off day 30 November 2021

# Background and scope in **CLIMATE RESILIENCE** which implies acknowledging

**UNCERTAINTY**

**COMPLEXITY**

## Stocktaking previous ESPON Knowledge relevant to understand territorial patterns of determinant issues for resilience:

- ESPON **GRETA** links to **demand/availability of ESS** relevant for resilience.
- ESPON **TITAN** evidencing that **vulnerability matters** beyond economic impacts.
- **ESPON CLIMATE UPDATE**, changing the previous **analytical framework**.

## Understand (and perhaps territorialise in some case) the current policy context and related instruments (II)

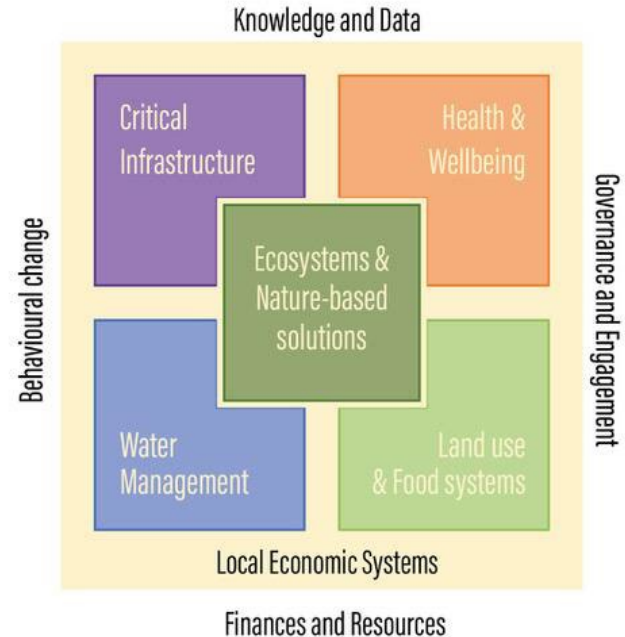

### EU Adaptation strategy

- **Smarter, Faster, Systemic, international** action.
- **Water, NBS, climate-protection gap, macro-fiscal policy, local adaptation, etc.**

## Understand (and perhaps territorialise in some case) the current policy context and related instruments (II)

### Mission Climate Adaptation

- Preparing, accelerating, demonstrating.
- **Place based, systemic** (multi-hazards, scales, sectors), **inclusive** (all stakeholders).
- **Key community systems and enabling conditions.**

## Understand (and perhaps territorialise in some case) the current policy context and related instruments (III)

- JRC **DRMKC** and **Risk Data Hub**.
- JRC **PESETA** report.
- **Climate adapt, C3S**.

## Insights about the way forward and the potential ESPON rol

- How to analyse and contribute to **societal transformation**.
- Important dialogue with **other resilience spheres** (health, biodiversity, cybersecurity, etc.).
- Explore and **exploit interactions and synergies with other TAP** (Climate neutrality, governance of new geographies, all people and places).

## Insights about the way forward and the potential ESPON rol

- **Integrated view** to be operationalised through the **Territorial agenda**.
- **Observatory** approach (**dynamic and recurring**).
- Room for **innovation in analytical approaches** and methods (paying attention to **HEU**).
- **Communication, coordination and cooperation** with other interested and **competent EC organs**.
