# **Settlement structure – Transport – Public services interaction**

WG3

# WS3 : QUESTIONS AND IDEAS

## Integrated strategy for a metropolitan public transport system

- Increase the accessibility of metropolitan resources for all level of municipalities (public services, inc schools, jobs, etc) by improving intermodality at the scale of the Metropolitan Region
- Elaborate a strategy at the scale of the rails corridors from/to Riga City (parking rail facilities...)
- Prioritize joint investments in regard with transport infrastructures development (together with public services, local investments in mobility, housing programmes...)
- Joint investments in order to develop an integrated fares/tickets system at the metrolitan scale

# WS3 : QUESTIONS AND IDEAS

**A common vision to improve urban quality (public spaces, roads...) and attractiveness at each level of municipalities**

- For Riga
- For the municipalities around Riga
- For regional and local centers

**More coordinated approach to land use planning and dealing with uncontrolled development**

**Share and distribution of public services, according to the type and importance of them (difference between services used on a daily base and others) between the different levels of municipalities**

**Transport and settlement challenges also raised the question of the relationships between Riga Regions and other Regions**
