ESPON-TNO Project 2019-2022

(attendees so far)

ESPON-TNO Project 2019-2022

(policy evaluations)

- Overall the TNO events were directly related to existing/upcoming national/regional policy plans (sometimes even explicitly as for OREK).
- In that respect the presented ESPON evidence and events were highly appreciated, and received lots of feedback also after the event.
- Sometimes this also lead to a new uptake and strengthened the dissemination for further research or the dissemination in a new territorial vision.
- However, and although the need for a further cross border coordination was sustained with the challenges presented, there is major uncertainty how to do this and who does what and when. Next there is still a big gap between the EU and local levels.

ESPON-TNO Project 2019-2022

(NEW TARGETED ANALYSES/OUTREACH)

- The events/ECPs prove to be a major carrier for the outreach of ESPON evidences; here the digital format has proven to be very successful in the outreach to stakeholders who weren't acquainted with ESPON and/or EU research)
- But there is a need to differ between ESPON evidences/events with regard to
 - **AGENDA SETTING**
towards integrated territorial policies with regard to the challenges ahead
 - **IMPLEMENTATION**
facilitating and helping lower governments in operationalization.
- Especially the latter needs more attention in the next ESPON program period
