LISTING OF ESPON DATABASE INDICATORS

SITUATION IN MARCH 2011

CONTENT

- This report proposes to list the indicators produced by ESPON Projects – under priority 1-2-3 – which are downloadable through the ESPON Database interface.

- The listing is organized by categories, following the ESPON Database structure: regional data, urban data, local data, neighborhood data, grid data, world data and historical data.

TABLE OF CONTENTS

Forewords

This Technical report lists all the indicators available in the ESPON Database which have been delivered by ESPON Projects (version March 2011). The most part of this data is free of download.

However, this technical report does not take into accounts the indicators of the ESPON 2006 Database (Access format), the Europe In the World database (ESPON 3.4.1)

In light orange are shown the indicators produced by the ESPON Database Project.

Indicators are listed as below:

- **Provider**: Name of the project who has delivered the data.
- **Indicator code**: Code of the indicator in the database. In most of the cases, the ESPON coding scheme has still to be applied to the indicators.
- **Indicator name**: Name given to the indicator (in the field indicator name of the metadata)
- **Year(s):** temporal validity of the indicator (Year"a" means a single year; year"x"-year"y" means an evolution or an interval)
- **Theme-Sub theme**: Thematic classification of the indicator, following the thematic structure developed by ESPON Database Project.
- **Geo object:** Territorial or spatial unit of reference (NUTS, LAU2, FUA etc.)
- **Geo version:** Version of the geographical object (NUTS 2006, LAU2 2008 etc.)
- **Space:** Geographical coverage of the indicator. When the all ESPON Area (EU27+4) is covered "ESPON Area" is mentioned (but it does not necessarily mean that the dataset is complete).
- **Category:** Precise where it is possible to download the data in the ESPON DB Web interface.
- **Dataset tittle:** For regional data only, name of the dataset where is include the indicator.

- **Regional data (1)**
