Accessibility of population to primary schools (considers study regions as a whole)

- Low accessibility/ Low population density
- Low accessibility/ Medium population density
- Low accessibility/ High population density
- Medium accessibility/ Low population density
- Medium accessibility/ Medium population density
- Medium accessibility/ High population density
- High accessibility/ Low population density
- High accessibility/ Medium population density
- High accessibility/ High population density

- Unpopulated case study area
- ESPON area
- Non-ESPON countries
- Main cities

This map analysis considers the case regions not separately but as a group, comparing highest and lowest accessibility and population densities between them.
