

ESPON Territorial Impact Assessment tool (TIA)

Training Session – Lisbon, 17th October 2019

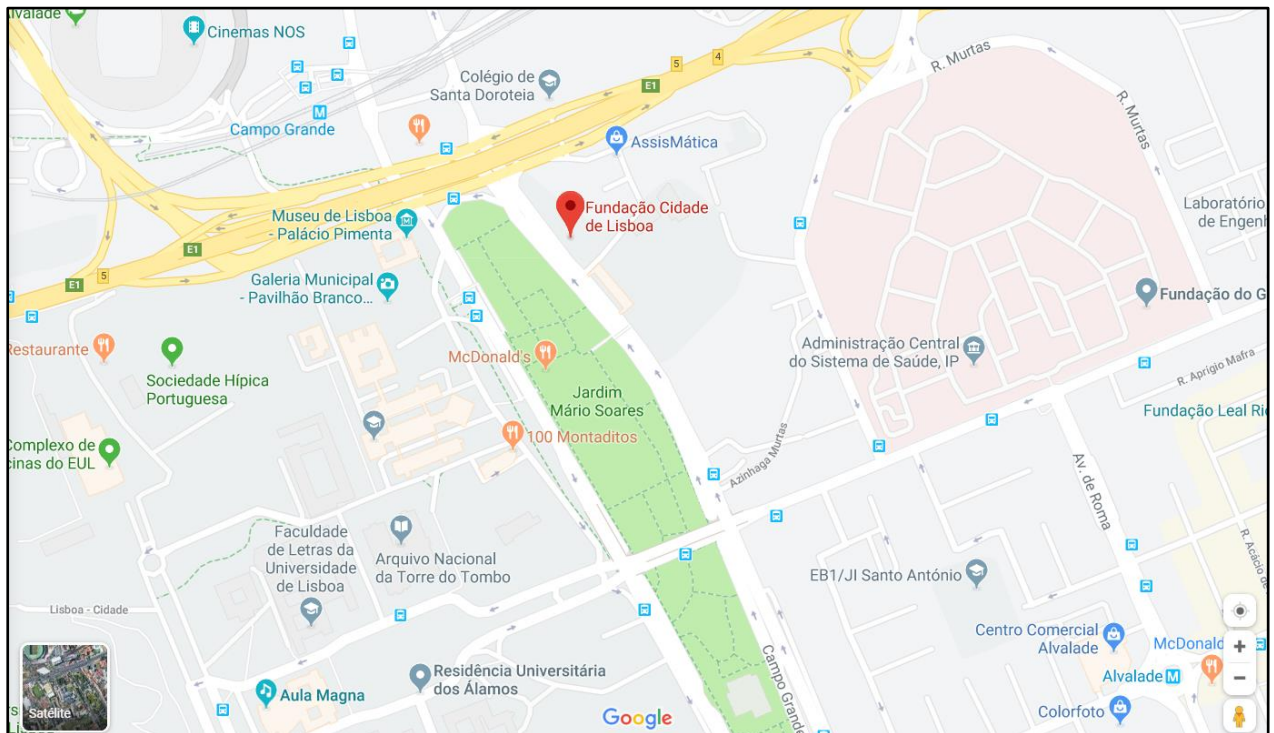

ESPON TIA Tool

The ESPON TIA web Tool is an interactive web application that can be used to support regional policy makers and practitioners with identifying, ex-ante, potential territorial impacts of new EU Legislation, Policies and Directives (LPDs).

The ESPON TIA web Tool combines the expert knowledge and judgements about the potential impact with a set of statistical data describing the characteristics of regions. Based on the different sensitivity of regions, the expert judgments are translated into maps showing the potential territorial impact of EU policy on NUTS 3 level. These maps can serve as a starting point for further discussion of different impacts of a concrete EU policy on different regions.

Location:

Fundação Cidade de Lisboa
Rua Campo Grande 380 1700-097 Lisboa – Portugal

Moderators:

Mr Bernd Schuh (OIR)

Mr Roland Gaugitsch (OIR)

Agenda

09.30	Welcome coffee	
10.00	ESPON QUICK SCAN introduction	Round of Introduction Introduction to the TIA tool Methodological background
12.30	Lunch	
13.30	Interactive testing of the tool on a sample Directive	During the interactive test run, tips and tricks for the moderation will be shown and technical questions on the functioning of the tool will be further explained.
16.00	Wrap-up	Summing up the results and feedback
