

Entrepreneurship and context – the interplay

Reflections from a couple of research projects, 20 years as a local entrepreneur and 30 years of enabling rural development actors

Rural Keys (Kamprad), RUBIZMO (H2020), Formative evaluation of regional rurdev projects Evaluations of the Leader programs in Sweden 1997-1999, 2000-2006, 2007-2013

Possible take-home messages:

- A need for a more holistic approach to societal development
 - give LEADER a broader role
- A need for entrepreneurs in every sector!
 - Not least: A need for knowledgeable and entreprenurial bureaucrats
- A need for financial instruments that allow co-fundning and crowd

SLU – what do we do?

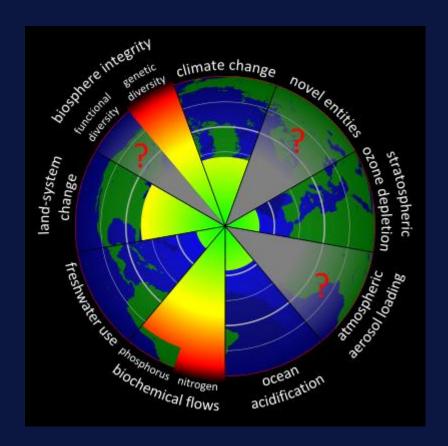

SLU develops the understanding and sustainable use and management of biological natural resources.

How do we do it?

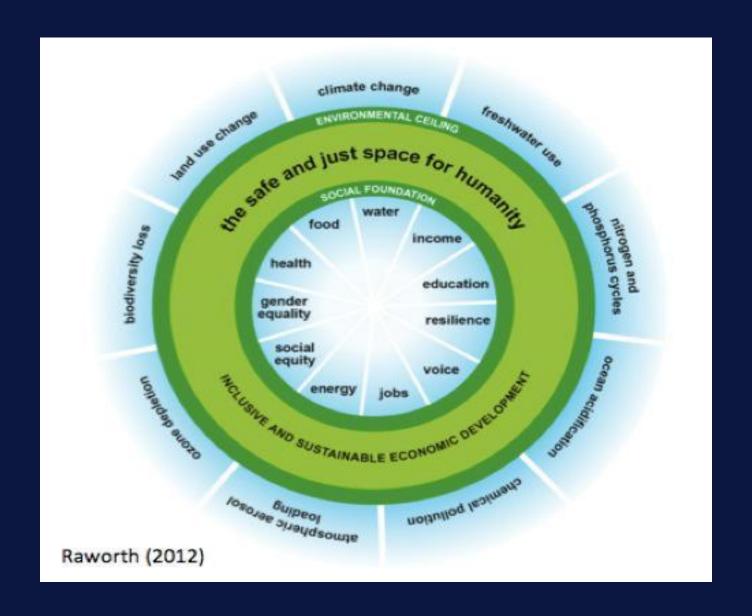

This is achieved by research, education and environmental monitoring and assessment, in collaboration with the surrounding community.

But Why?

Re-Think!

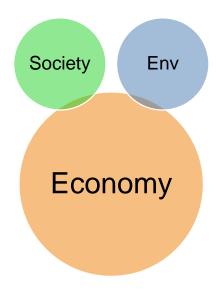

On our current "economy":

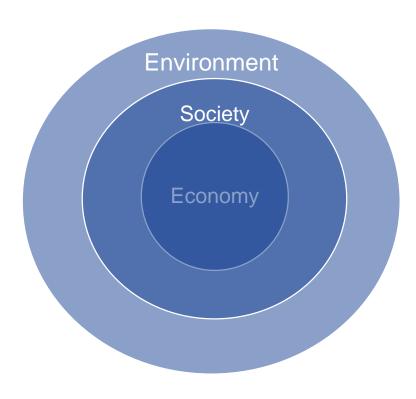

"Our arms have become so long, we cannot see what our hands are doing..."

Helena Norberg-Hodge

Mickey Mouse vs Bulls-Eye economy...

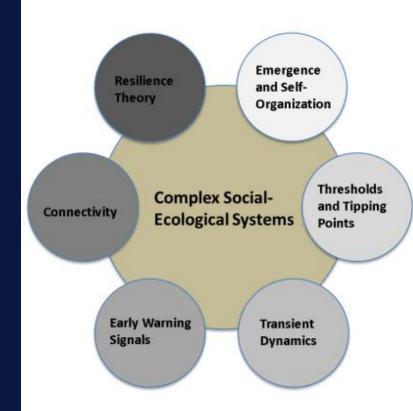

Warning: Complexity ahead

"There are no easy, off-the-shelf solutions for persistent societal problems, because these are caused by fundamental flaws in our societal systems. Such systemic errors demand radical changes in our thinking and actions, i.e. transitions and system innovations."

(Rothmans, 2005)

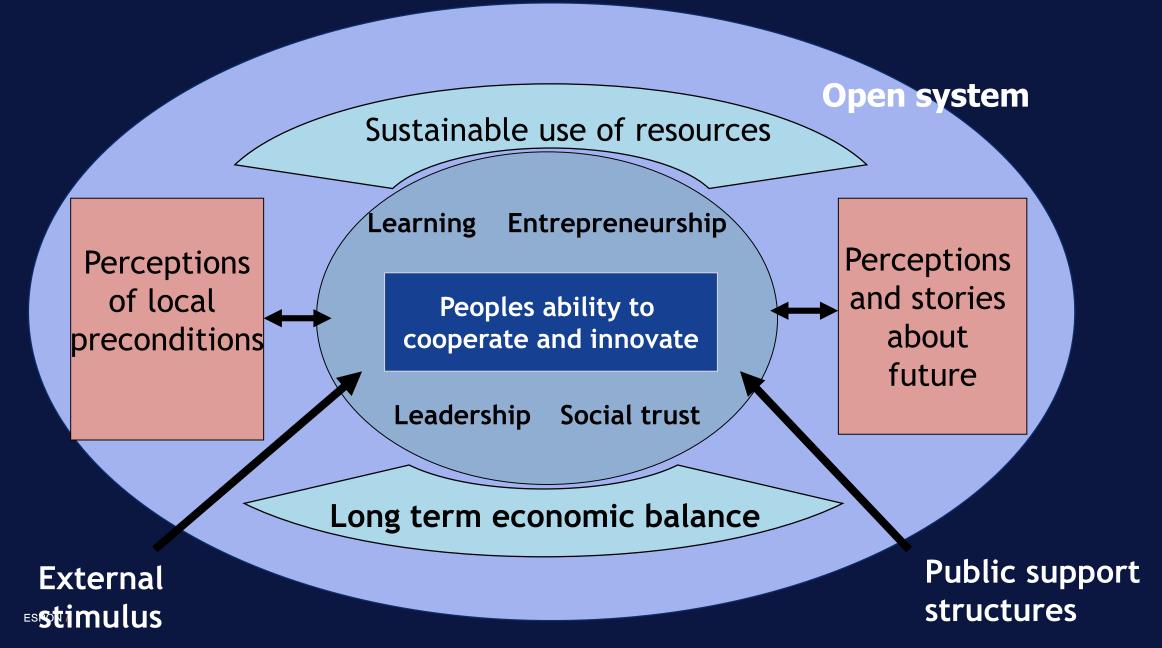

Cork declaration - considerations

Convinced - of the value of rural resources capable of delivering sustainable solutions to current and future societal challenges that concern all citizens of the Union such as assuring a safe and sustainable provision of quality food, developing the circular economy, broadening the bio-economy, fostering resource efficiency, combating climate change and reducing the reliance on fossil fuels;

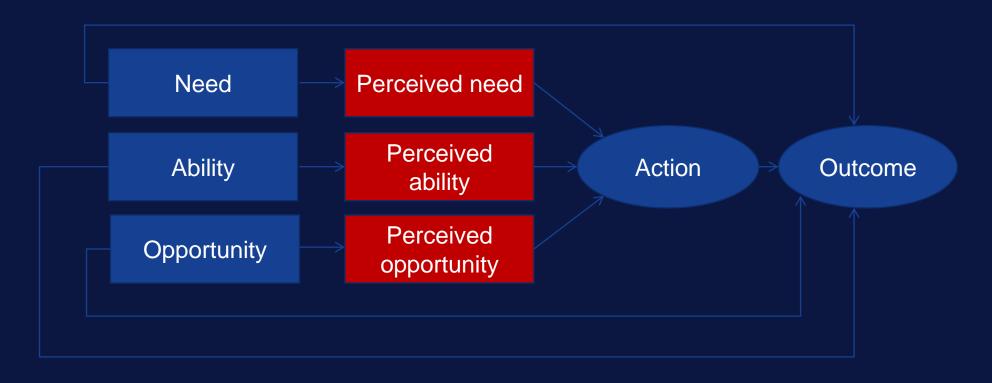

The societal contract is under re-negociation

Practicing glocal sustainability

Entrepreneurship and outcome...

Entrepreneurship?

– indeed, but not
"business as ususal!"

Re-economy

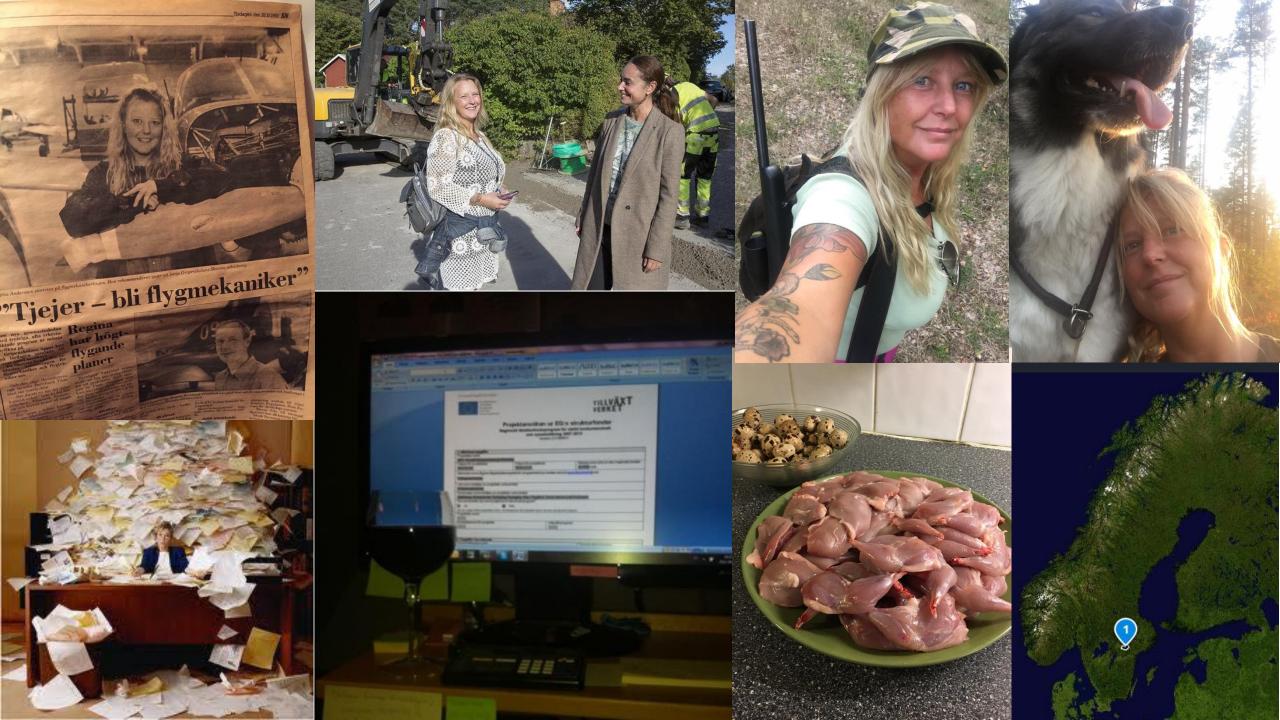

A statement:

"Developing and running a sustainable rural business requires a supportive context. Today, this requires high-speed connectivity, a supportive regional strategy and with knowledgeable and entrepreneurial bureaucrats as well as a local culture allowing and embracing both failures and successes."

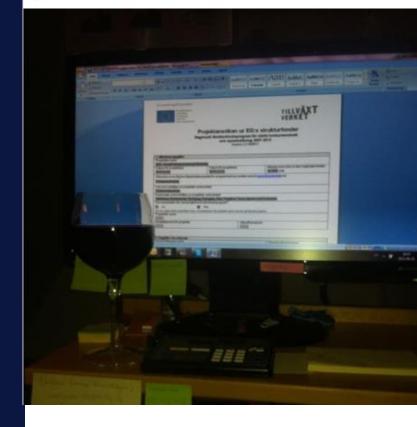

"My Friday... Just arrived from Uppsala and my speech to the students at SLU... had to turn around att the doorstep to go and do some shopping and to get the broken car towed to the workshop. Home again, my sweetheart loaded the car with some hunting gear and the eldest son, and then they were gone. Getting something to eat before driving to and waiting for my youngest finnishing his hockey practice. Now a big glass of wine and sitting behind the computor completing the last bits of the application – I have until midnight...

Quite an ordinary Friday. "

Min fredag.. Hemkommen från Uppsala å föreläsningen till studenter på SLU... Vända i förren för att fara å handla samt få trasig bil bogserad till verkstad... Hem, raringen springer in å laddar bilen m jaktprylar å äldsta sonen... Sen pös de två.. Äta m lilleman å invänta hockeyspelande son nr tre... Nu ett stort glas rött å bänka mig m projektansökan å fixa det sista... Har till midnatt på mig... En helt vanlig fredag typ.....

Mälardalen

Integration och företagande

Nyhet

SVT Västmanland besökte NF- Nyanlänt Företagande i programorten Arboga för att se hur programidén ser ut på plats för nyanlända som vill starta företag.

SVT Västmanland 20171101

"Många nyanlända vill starta eget företag i Sverige och för att hjälpa dem har fler kommuner i Västmanland satsat på ett projekt – Nyanlänt företagande. Tre företag är redan på gång att startas upp.

– Jag är här för att jag tror att det här kan vara viktigt för min framtid, säger Lani Emuy, en av deltagarna i projektet.

Re-learn

Smart village – a tentative definition

In the smart village, the private, civil and public sector systematically collaborate in an inclusive democratic process where they use digital technology and glocal networks to speed up the transition to a sustainable rural life.

The circular economy

What will Al do to rural areas?

The IOT and AI are the keys to realiz[ing] society 5.0,"

With definition above: is CI more important than AI?

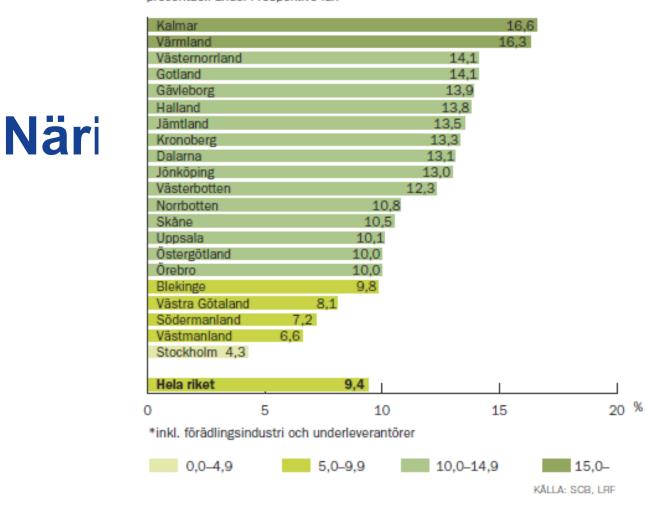

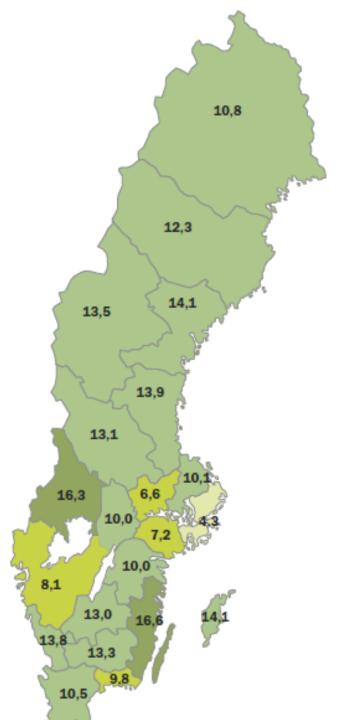

ESPON // 2018-10-03

De gröna näringarnas* andel av sysselsättningen

procentuell andel i respektive län

I Kalmar och Värmlands län svarar de gröna näringarna för mer än 16 procent av all sysselsättning. Räknar man med den inducerade sysselsättningen, skapar de gröna näringarna mer än en fjärdedel av alla jobb i Kalmar län och Värmland.

Spel som utmanar gängse normer

Hem Vad är Cohero? För företag I skolan

För föreningsliv och folkrörelser

Välkommen till Cohero

Cohero är ett spel som är utvecklat för att lära grupper fungera bättre tillsammans. Det handlar om samarbetets möjligheter och utmaningar och förutsättningarna för en grupp att lösa problem med en högre grad av komplexitet än enskilda individer kan hantera.

För företag

Med globala och komplexa marknader, där konsumenter har brokiga önskemål och höga krav nå kvalitet, förändras villkoren för allt

Läs mer om Cohero...

Cohero i skolan

Cohero vill vara med och sprida psykologisk kunskap, vad som motiverar oss människor och hur vi heter oss och samarhetar

För föreningar

Cohero vill vara med och verka för framväxten av framtidens föreningsliv och folkrörelser. Vi tror att nsykologisk kunskan.

Peak everything...

- Climate will we see a flip-over?
- "Peak oil peak phosforus"?
- Ecosystemservices?
- Fresh water?
- Economy crashing?
- Global injustice growing gap?
- Social tensions in society increasing?
- Robotization?
- European instability
- → Society faces radical new challenges
- → Rural Development with new opportunities

Considerations

- Embeddedness vs embedding
- Bricolage Bricolage = construction or creation from a diverse range of available things, the process of improvisation in a human endeavor
- Stong ties week ties
- Resourcing
- Opportunitizing
- Visualizing
- GRIT "perseverance and passion for long-term goals." (Angela Ducksworth)
- Digital divide Al divide
- Climate change

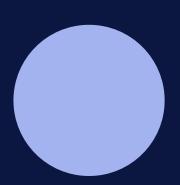

The context for Regina

- They have let me do my thing
- I have not been able to get sufficient space within the municipality

Cork declaration: - A better life in rural areas

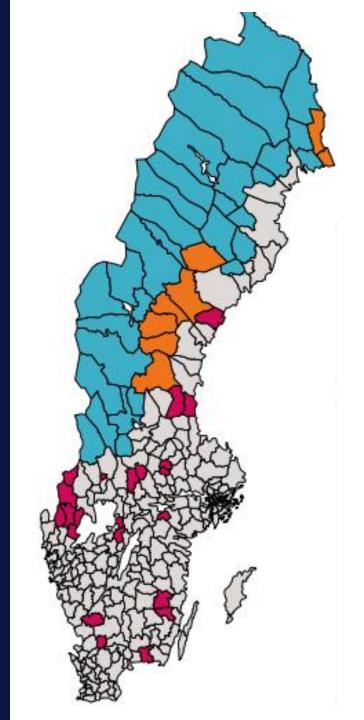

- 1. Promoting Rural Prosperity
- 2. Strengthening Rural Value Chains
- Investing in Rural Viability and Vitality
- 4. Preserving the Rural Environment
- Managing Natural Resources
- 6. Encouraging Climate Action
- 7. Boosting Knowledge and Innovation
- 8. Enhancing Rural Governance
- 9. Advancing Policy Delivery and Simplification
- 10. Improving Performance and Accountability

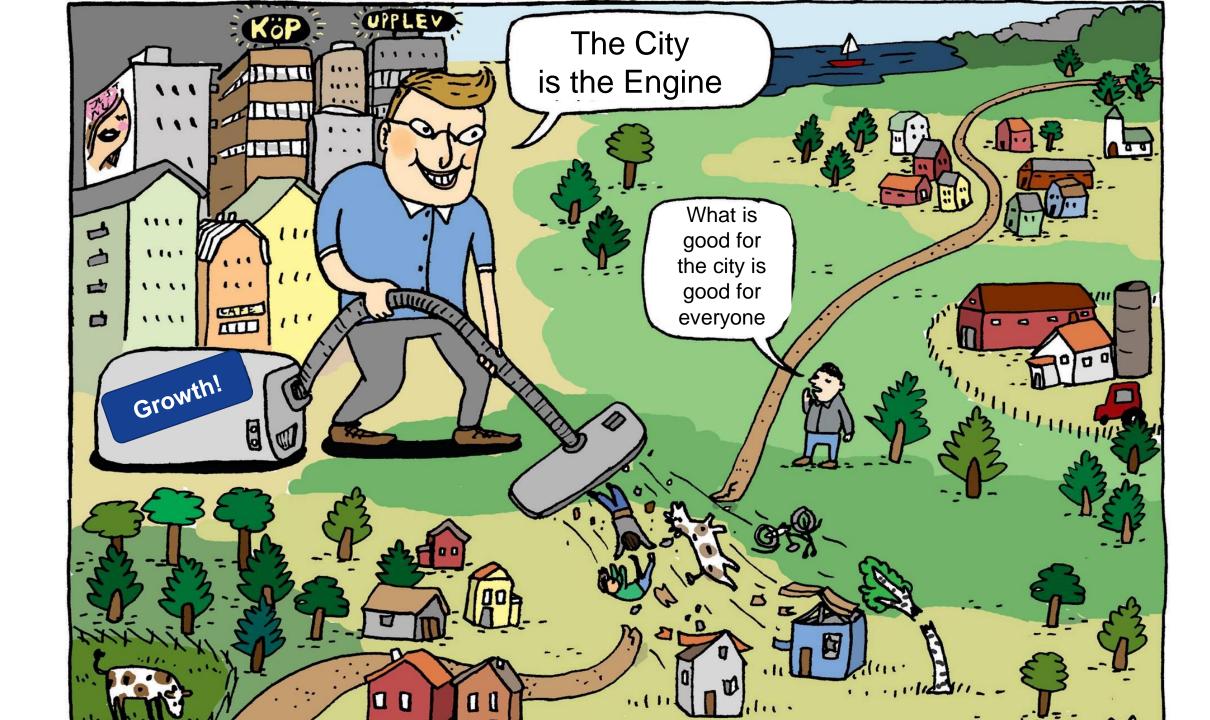

A question:
- in which of these
do we NOT need
entrepreneurship?

Two new bills (from the previous gvt)

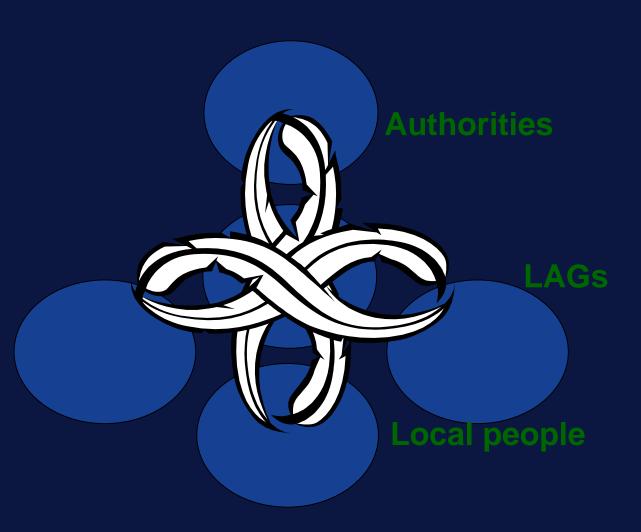

- 1. Improved Business Climate (+ orange)
- 39 "vulnerable" municipalities
- 70 MSEK/year 2018-2020
- 2. Strengthening socio-economic dev. (+ orange)
- 30 "disadvantaged" municipalities
- 75/150/300 MSEK 2018-2028

Bottom-up?

Connecting and improving the two realms of bottom-up is a matter of multitier learning – vertical and horisontal

Real bottomup is not the opposite of top-down!

Because this is what matters. To everyone. Everywhere. Now. And because we believe in knowledge in action - in the "engaged university"
